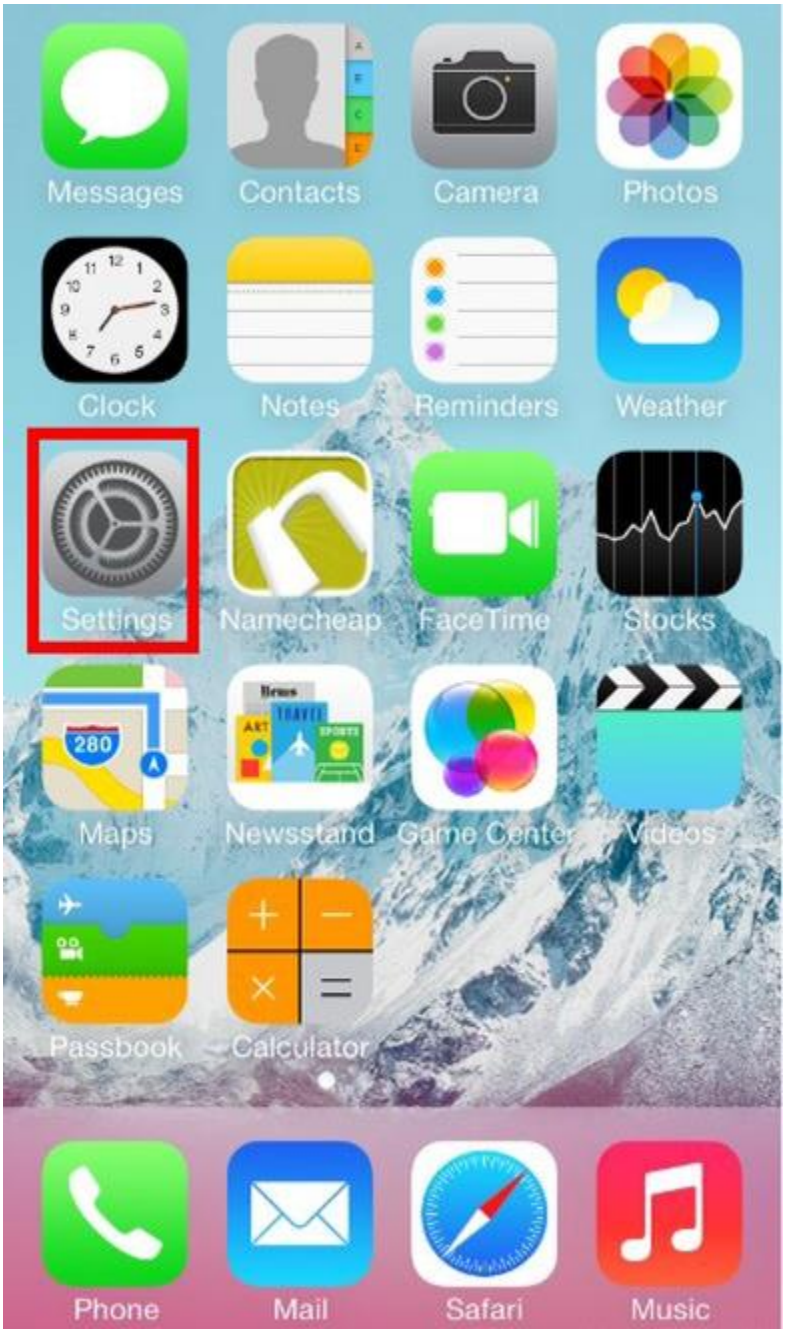
Email account setup on iPhone (SMTP/IMAP/POP3)

Please follow this step-by-step instruction in order to set up your iPhone:

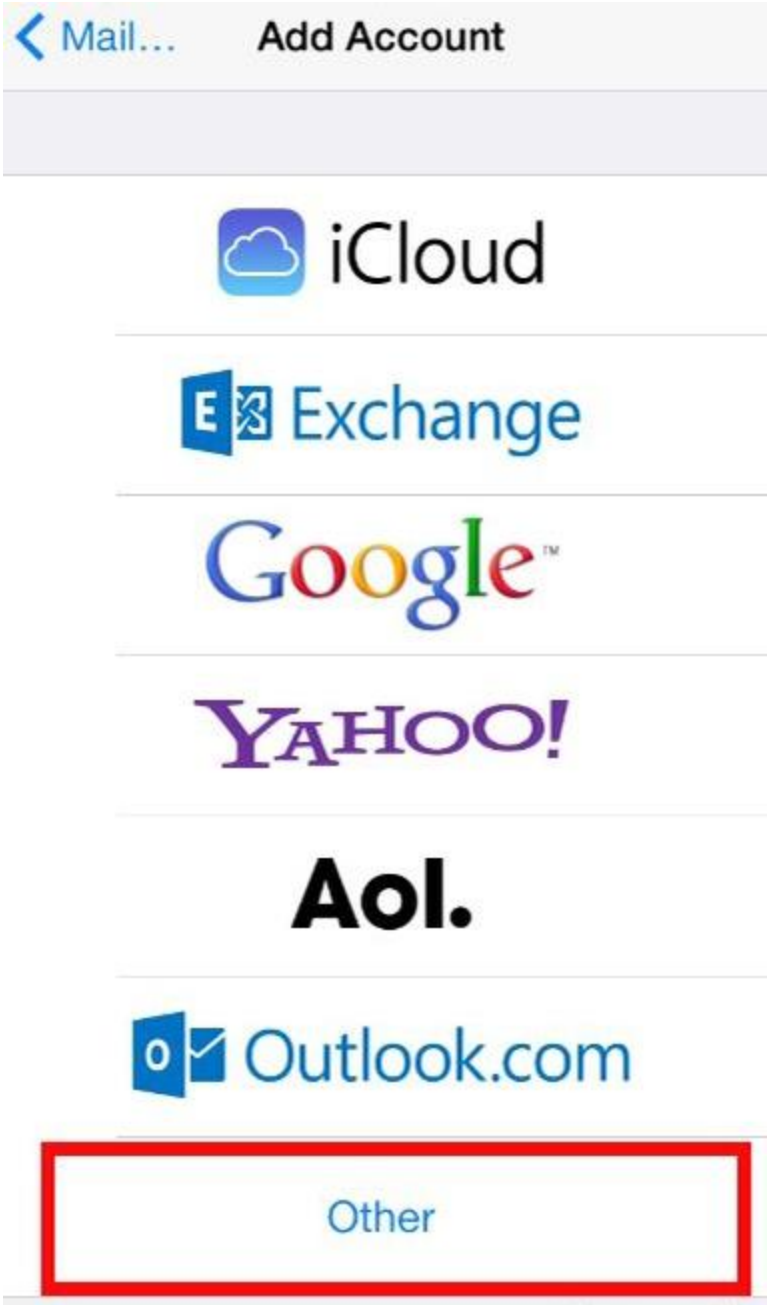
Select **Settings** from the home screen of your iPhone



Choose **Mail, Contacts, Calendars**

Click on **Add Account**

Choose **Other** from appeared list

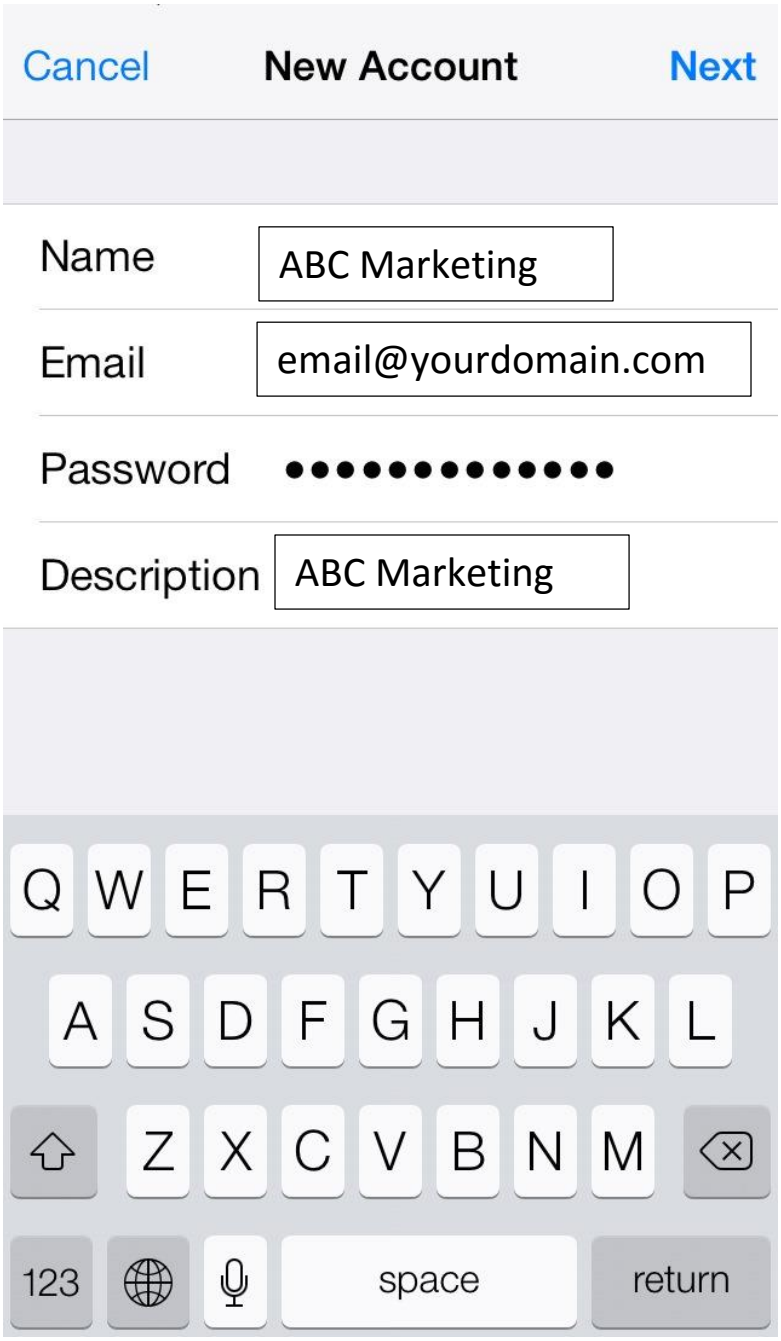


Select **Add Mail Account**

In the **New Account** menu, you will need to specify the following records:

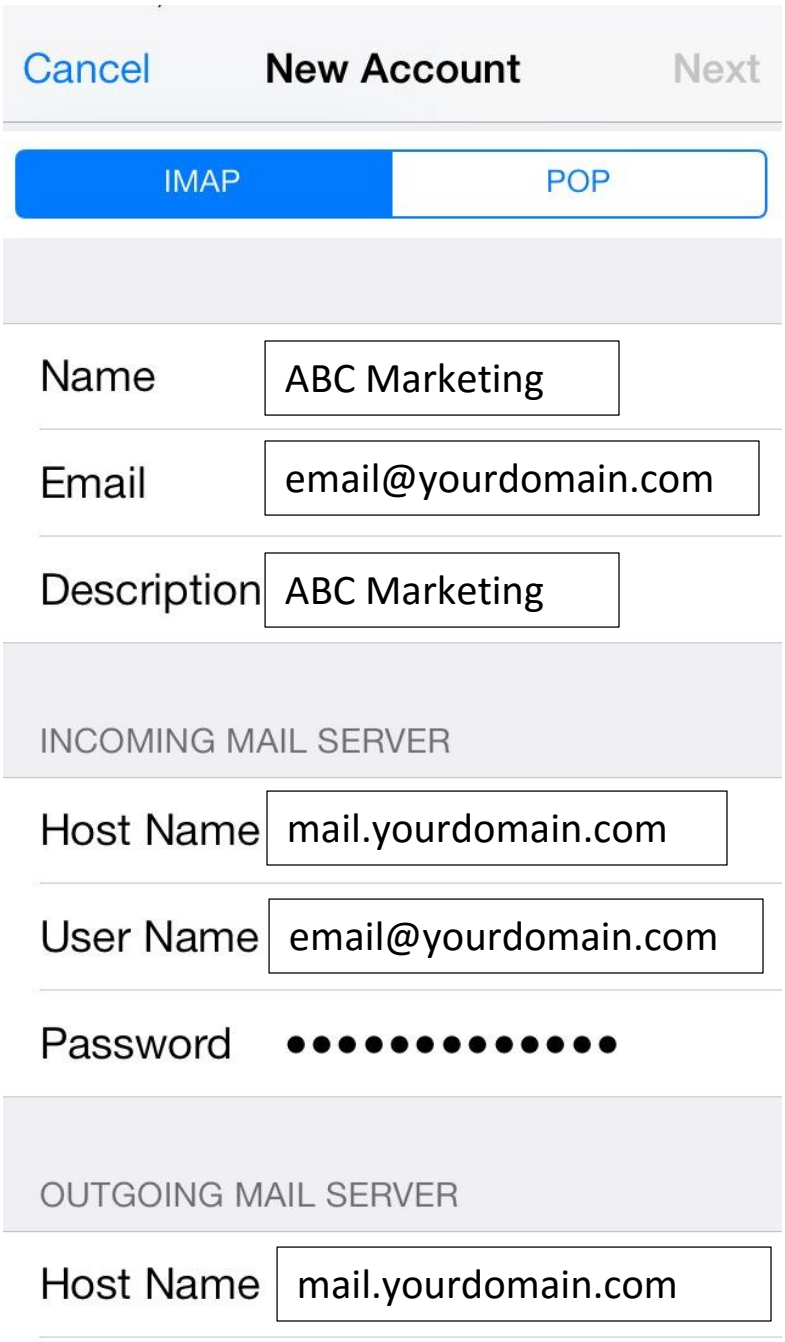
- **Name:** your name, it will appear as a sender name
- **Address:** your full email address that was created with ABC Marketing
- **Password:** password of this email address

- **Description:** you can specify any description. But we advise you to specify your email address



Click on **Next.**

Select protocol type: IMAP or POP3. We advise you to use IMAP. The selected one will be highlighted blue.

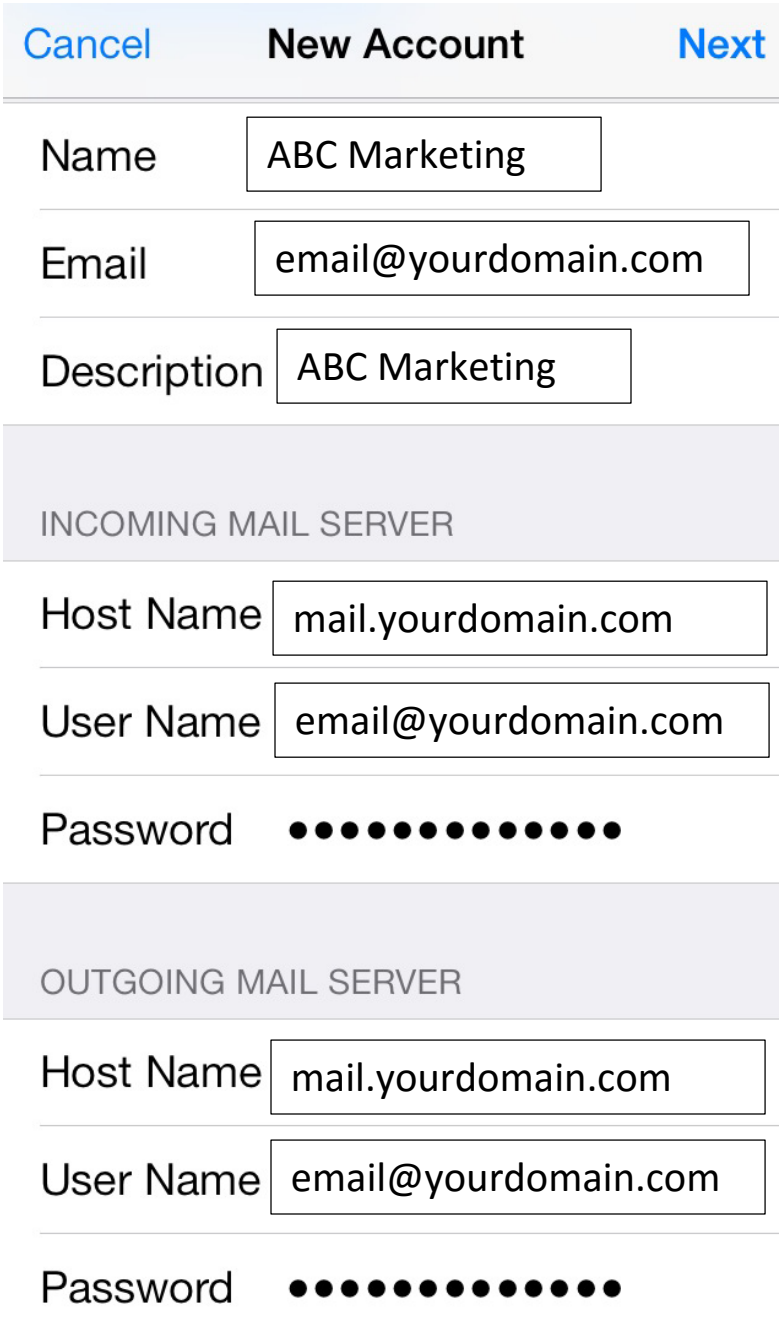


Settings are equal both for IMAP and POP3 on this step:

The fields: **Name, Address** and **Description** should have been already filled in.

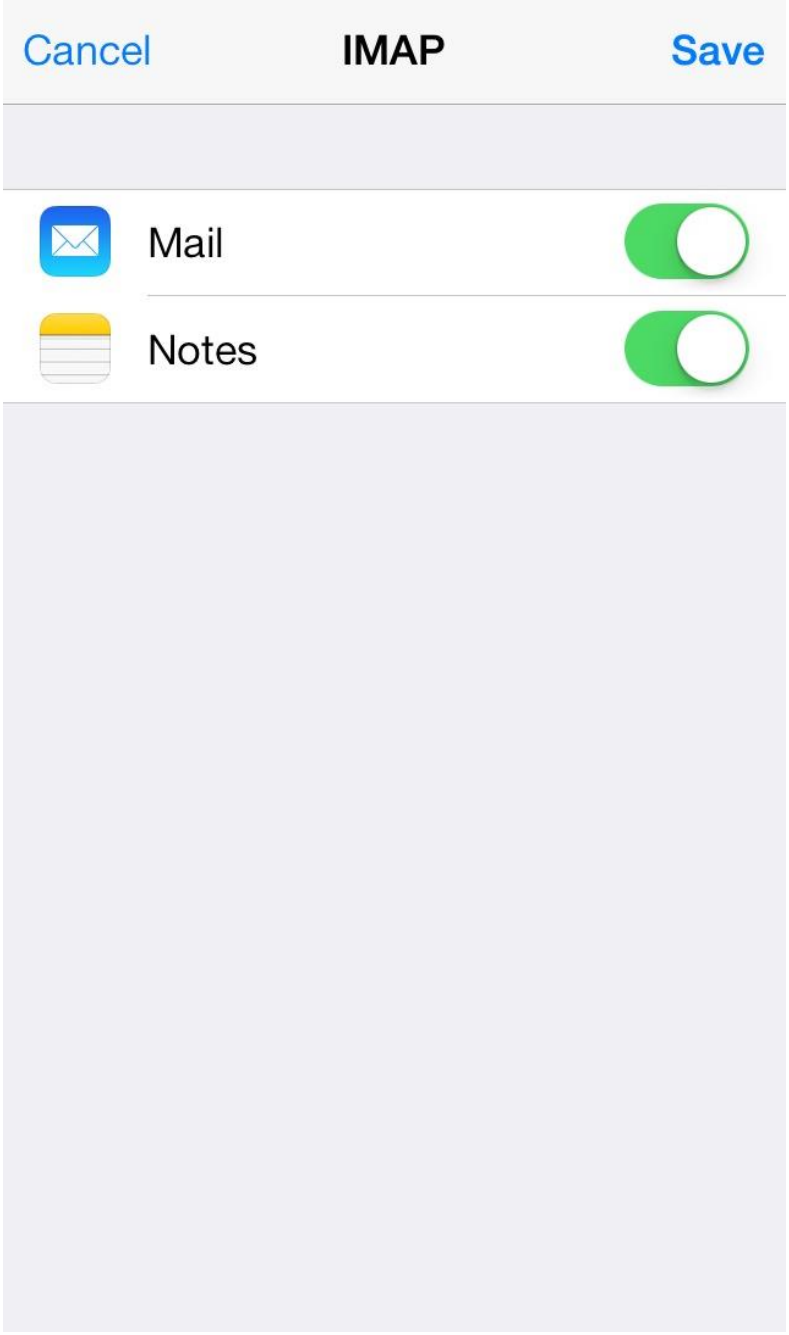
- **Host name:** mail.yourdomain.com
- **User Name:** your email address
- **Password:** password for your email

Indicate in the fields for both Incoming Mail Server and Outgoing Mail Server the following settings:
The settings example:



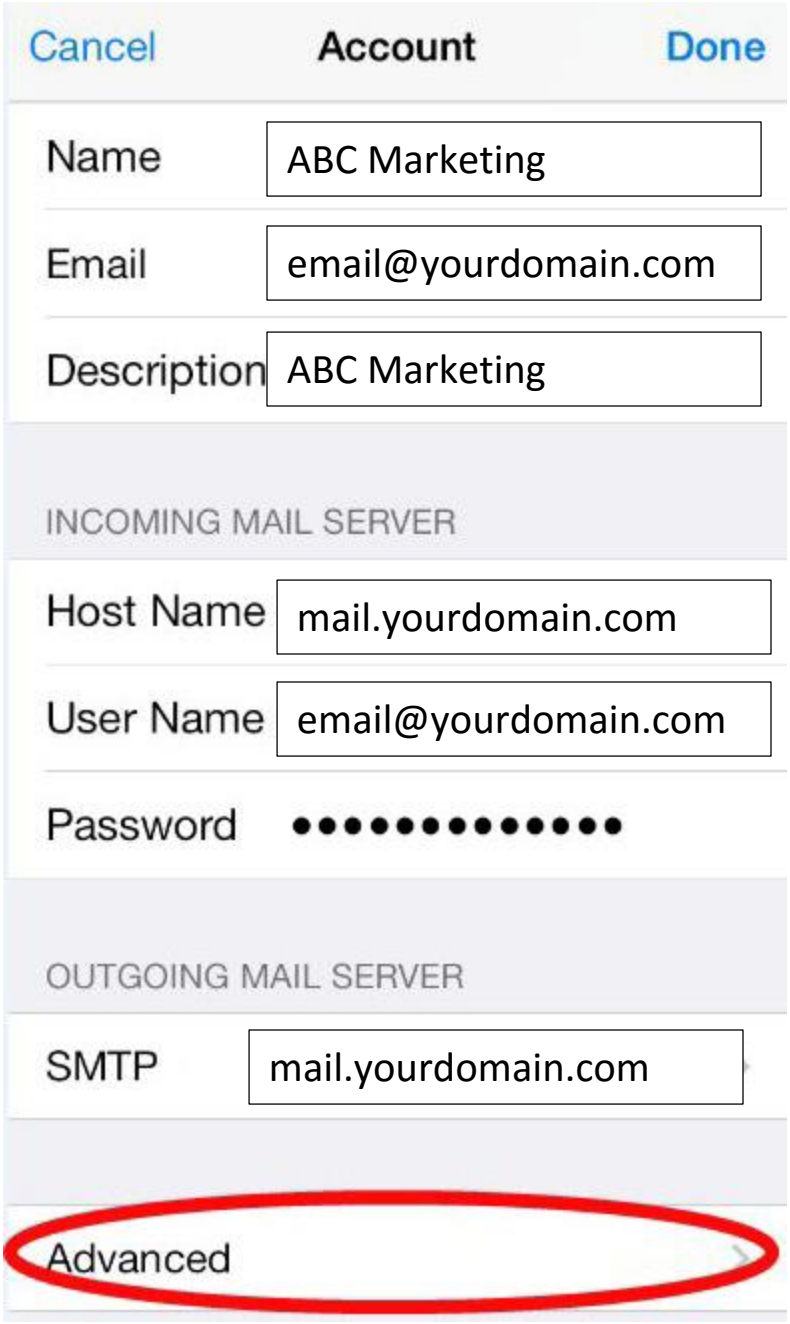
Click on **Next**.

If you use IMAP, It is possible to enable the following services:



Click on **Save** and wait till checking is finished.

When the check is finished you will be redirected to **Mail, Contacts, Calendars** screen.
Please enter your newly created account and go to **Account Info**. Scroll down the screen and select **Advanced**:



You will be able to choose additional settings for **IMAP** or **POP3**:
If you set ***IMAP*** connection you need to use the **ports: 993** ***(with SSL)*** or **143** ***(without SSL)***.

Set ***IMAP Path Prefix*** to **INBOX**
